

SKILLS Full Stack Developer, JavaScript, Python, React, Redux, Flask, Express, CSS, HTML, Node, C#

PROJECTS

JumpStarter (React / Redux, Flask)

[live](#) | [github](#)

KickStarter Clone

- Integrated a dynamic search feature that accurately filters through project titles and displays the results in a dropdown menu under the search bar using SQLAlchemy to return all projects, React to visually show the changes in display, and JavaScript to filter the project query .
- Implemented a moving carousel using CSS to display all the projects listed in a particular project in a single row.

Clip It (React / Redux, Flask, AWS)

[live](#) | [github](#)

Reddit Clone

- Developed a platform allowing users to upload and share different types of videos.
- Ensure storage stability by utilizing AWS S3 cloud service to store files of multiple file types pertaining to videos while also restricting those that do not.
- Allow users to discuss or share their personal opinions on each video.

Tune Cloud (React / Redux, Express)

[live](#) | [github](#)

SoundCloud Clone

- Incorporated a React-Audio-Player package to play given audio urls and have it dynamically change depending on the song chosen.
- Programmed the audio player to keep its React state song to incorporate continuous play which enables the player to not conclude or break off when navigating to different pages

EXPERIENCE

Front of House

Wonderful House

Mar 2007 - Current

- Organized multiple catering requests to multiple different institutes between 2016-2019 which helped foster time management, and teamwork skills.
- Resolved complaints from customers while minimizing loss using social and communication skills.
- Acquired experience working in a fast-paced environment while employed as a waiter.
